

N
Scale

Adding a Turntable to your layout has never been easier!

KATO
PRECISION RAILROAD MODELS

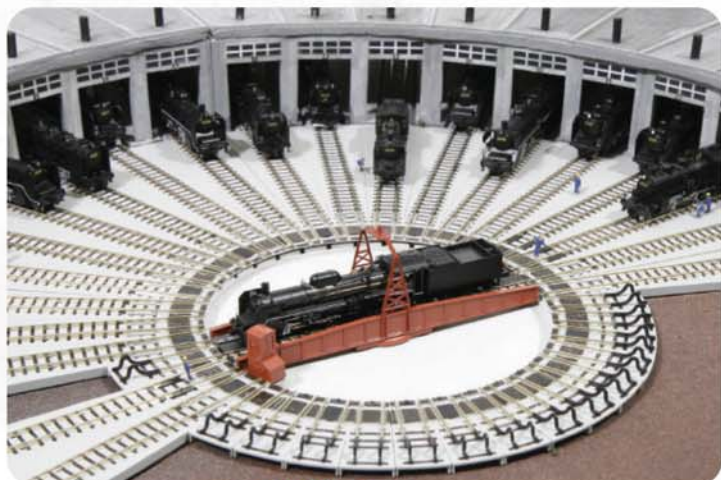

New for the Kato N Scale line is Kato's Electric Turntable!

This new turntable makes it easy for modellers to add this iconic and functional railway structure to their layouts, whether they're tabletop modellers or building a fully scenic model railway!

Modellers can add up to 36 separate tracks on this motorised turntable, each one capable of being independently powered either by the 6.3" turntable bridge (which also functions as a rotating track feeder) or through the optional **K20-284 Turntable Extension Track Feeder Kit**.

As the name implies, the Kato N Scale Electric Turntable is fully motorised with twin motors that rotate the bridge and index it so that it will line up perfectly with your tracks **every time!**

Everything you need to get started is in the base Turntable set (**K20-238**) - add-on track packs and other accessories let you customise the turntable with both straight and curved tracks as well as adding a roundhouse and engine sheds which will be released in the future.

K20-283	Electric Turntable	Only £249.95
